

DoorMats

With its own in - house extrusion facility, Star provides Automotive Carpet raw materials to the OEM market and car mats for the after market. Starting from specially engineered Automotive BCF yarns to carpets and then onto finished car mat sets all are produced under one roof. Having an experience of more than 15 year, Star has achieved a reputation for innovation and quality in the Asia Pacific region.

The Heart Of Our Process

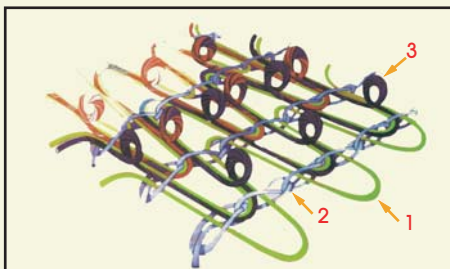

Equipment at Star is regularly up - graded to meet the demands of changing market. Our unique woven interlock process eliminates the need for costly conventional backings. Simple latex backing provides the required stability and non - slip properties to our loop - pile car mats.

We Work For You

Our strategy is to simply work for customer's satisfaction. We always encourage our customers to bring in their own designs and ideas. Whether it be OEM market or after market, we can engineer a product suitable to any budget. We work from a master color bank of more the 200 colors. In case if the customer requires a special color, we also provide matching service to coordinate with the car interior. From graphic design to High - Low or plain to a multicolored plush pile, all are possible at our facility.

Construction Method

1. **Base Yarns** provide overall stability
2. **Lock Yarns** act as an interlocking device to lock the loops in place.
3. **Pile Yarns** feature independent loop Construction.

The ANYWHERE RUG

Available in hard wearing plush - pile or woven interlock loop - pile. In sets of two, four or five.

Product Code : Doormat
