Inspiration & Innovation

It took a dash inspiration & Innovation to work it out - interlocking the backing and face yarns simultaneously creates a tougher carpet than the traditional, tufted variety.

Tufted Loop Pile Carpet

Face yarns in conventional carpets are simply punched into a primary backing with no tuft lock stability. This means tufted loop pile carpets can easily unravel and zipper as they depend on the strength of latex or other backing materials to hold them in place. As a result, threads continue to run leaving ugly gaps in the pile.

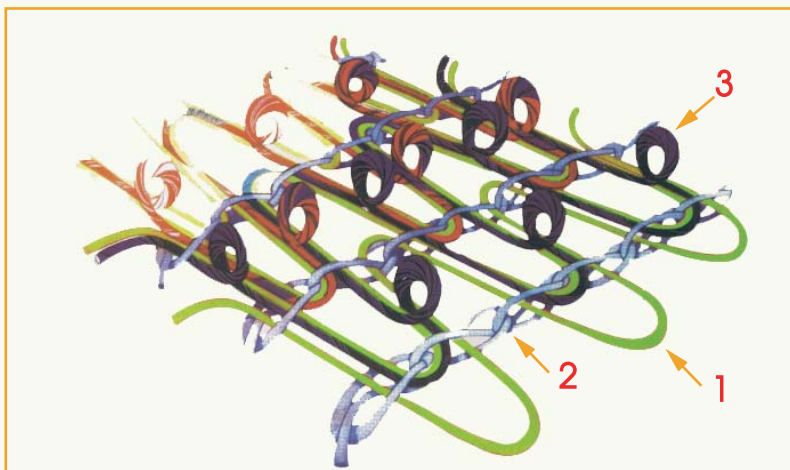

Inspiration & Innovation maintains its beauty longer through an evenwearing carpet surface that minimises matting and crushing, and eliminates traffic patterns. So add a dash of Inspiration & Innovation to your carpet choice

Inspiration & Innovation. The longer - lasting carpet.

Construction Method

1. **Base Yarns** provide overall stability
2. **Lock Yarns** act as an interlocking device to lock the loops in place.
3. **Pile Yarns** feature independent loop Construction.

Inspiration & Innovation

is an innovation woven interlock carpet designed to withstand the heaviest traffic conditions. It is available in 14 strong colours to suit any environment - from restaurants, holiday resorts, business office, hotels, hospitals or schools. Inspiration & Innovation has extraordinary durability and performance due to a unique woven interlock manufacturing method.

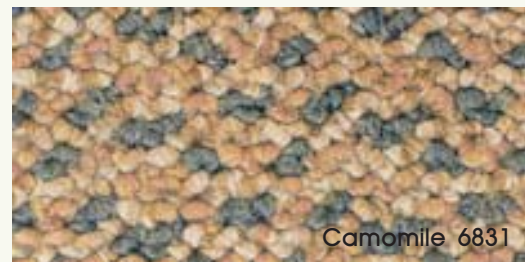

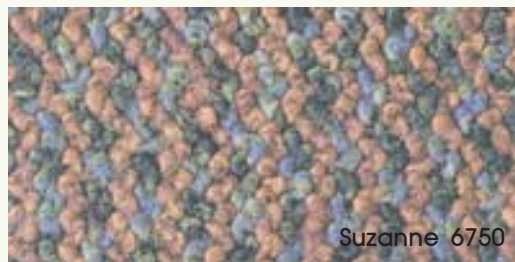

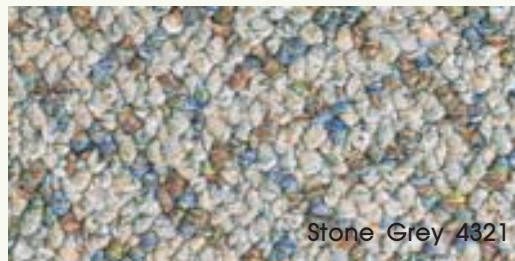

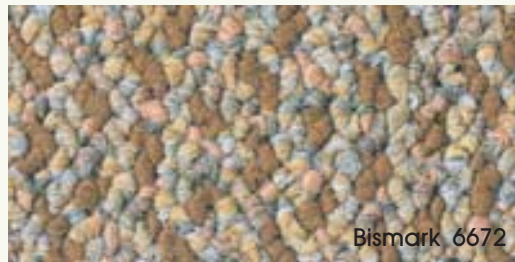

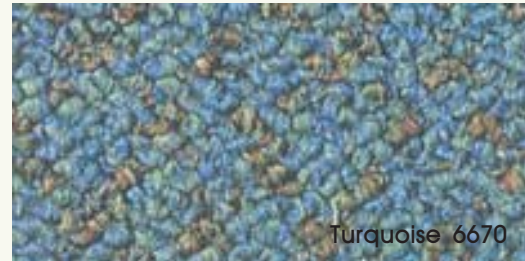

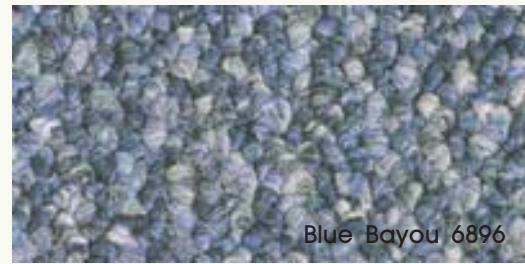

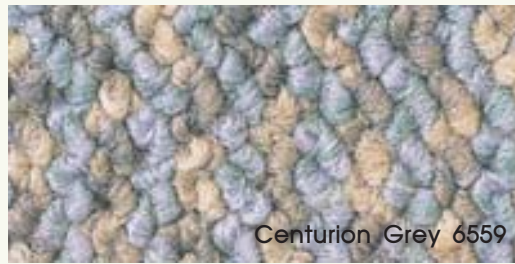

Inspiration & Innovation comes with a lifetime guarantee never to zipper or unravel, even with the hardest of wear and abuse.

Star Carpets is a second - generation family business specialising in the manufacture of olefin yarns and quality

broadloom woven interlock carpets for customers throughout the Asia Pacific Region. The company makes a diverse range of products and has the flexibility to tailor flooring solutions to individual customer requirement.

Star Carpets is committed to quality in every aspect of the carpet - making process, state - of - the - art machinery to using the most advanced yarns and backing systems.
